

FAMILY SUPPORT SERVICES PROGRAM

Here at the Ronald McDonald House of Fort Worth (RMHFW), we offer a program called Family Support Services (FSS). This program provides **compassionate emotional support** for all children, parents, and families throughout your time staying with us and continuing after you leave RMHFW. The purpose of the Family Support Services program is to provide **stability** for families who are far from their home, who lose their support system, and need a place to **feel safe and understood**. This program promotes **mental health wellness** and recognizes the impact your family's medical journey has had on you and others.

What this program has to offer:

- ✓ One-on-one meetings with a licensed marriage and family therapist associate who can provide support during your stay
- ✓ Resources such as postpartum care, mental health/therapy resources, financial aid resources, family resources for parents and children, and much more.
- ✓ Group activities and educational workshops for parents and children
- ✓ Continued care as you transition home. Referrals to local resources if applicable.
